

## 1 Product

### Afghan raisins

|                     |                                                                               |
|---------------------|-------------------------------------------------------------------------------|
| General description | normally developed and without cores.                                         |
|                     | The raisins are prepared from clean, sun dried grapes and without infestation |

## 2 Sensory

|                                        |                                                                                              |                          |
|----------------------------------------|----------------------------------------------------------------------------------------------|--------------------------|
| Appearance / colour                    | dried, whole, seedless grapes of relatively equal size and shape, with light shining surface |                          |
| Flavour/taste                          | Characteristic, without foreign taste/flavor, sweet-tasting                                  |                          |
| Texture                                | Characteristic, solid flesh                                                                  |                          |
| Berry count<br>(+/-5% various by crop) | Standard                                                                                     | ca. 260-310 berries/100g |
|                                        | Medium                                                                                       | ca. 380-500 berries/100g |
|                                        | Small                                                                                        | ca. 550-650 berries/100g |

## 3 Chemical and physical data

|                                   |              |
|-----------------------------------|--------------|
| Moisture                          | max. 17 %    |
| Oil                               | max. 0,5 %   |
| Sulphur                           | not detected |
| Aflatoxine B1                     | max. 2 µg/kg |
| Aflatoxine total (B1, B2, G1, G2) | max. 4 µg/kg |
| Ochratoxine A                     | max. 8 µg/kg |

## 4 Physical properties

### A-Grade

(2x machinery, cleaned and washed, 2x laser scanned, 3x handpacked)

|                     |            |
|---------------------|------------|
| Damaged berries     | max. 3 %   |
| Undeveloped berries | max. 1 %   |
| Sugared berries     | max. 2,5 % |
| Mouldy berries      | max. 1,5%  |

|                                             |                                |
|---------------------------------------------|--------------------------------|
| Capstems /100g                              | max. 3 pieces                  |
| Stalks 4-10 mm/carton<br>attached<br>loose  | max. 2 pieces<br>max. 3 pieces |
| Stalkes > 10 mm/carton<br>attached<br>loose | max. 1 piece<br>max. 1 piece   |
| Foreign pieces < 2mm                        | max. 1 piece/t                 |
| Stones/ Tone                                | max. 2 pieces/t                |

#### 4 Microbiology

|                           |                   |
|---------------------------|-------------------|
| Total aerobic plate count | max. 50.000 KBE/g |
| Yeasts                    | max. 25.000 KBE/g |
| Mould                     | max. 50.000 KBE/g |
| Enterobacteriaceae        | < 1.000 KBE/g     |
| E-coli.                   | < 100 KBE/g       |
| Salmonella                | negative in 125 g |

#### 5 Ingredients

|    | List of ingredients in % according LMKV | Country of origin       | %  |
|----|-----------------------------------------|-------------------------|----|
| 1. | Raisins                                 | Afghanistan             | 99 |
| 2. | Oil from sunflower seeds (GMO free)     | Turkey, Russia, Ukraine | 1  |

Suitable for a vegetarian and vegan diet.

#### 6 Nutritional data

|                                                                                                                   |       |                                   |      |

## 7 Packaging/Storage/Shelf Life

As Primary packaging with product contact we only use material which corresponds the legal regulations for example:

- Regulation (EG) no.1935/2004 „Framework regulation for Food contact material“
- LFGB food, consumer goods and feed code
- Regulation (EG) No. 2023/2006 „good manufacturing practice“
- Especially for plastic: VO (EG) 10/2011 and 174/2015

For all primary packages declarations of conformity are available and can be viewed if required.

|                    |                                                                                     |
|--------------------|-------------------------------------------------------------------------------------|
| Packaging          | 12,5 kg cartons made of cardboard with a protective insert made out of Polypropylen |
| Storage conditions | 8-10°C, relative humidity max 60 %                                                  |
| Best before date   | If properly stored 12 months from date of production                                |

## 8 Allergens according to EU directives (EU 1169/2011)

| Allergens                                                                                                                               | Contained in the product | Crosscontamination possible | Precise description |
|-----------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-----------------------------|---------------------|
| grains containing gluten (e.g. wheat, rye, barley, oat, spelt, kamut (or their hybridized strains)> 20 ppm gluten, and products thereof | Not included             | No                          |                     |
| shellfish                                                                                                                               | Not included             | No                          |                     |
| eggs and products thereof                                                                                                               | Not included             | No                          |                     |
| fish/ seafood and products thereof                                                                                                      | Not included             | No                          |                     |
| peanuts and products thereof                                                                                                            | Not included             | No                          |                     |
| soy beans and products thereof                                                                                                          | Not included             | No                          |                     |
| milk and products thereof (including lactose)                                                                                           | Not included             | No                          |                     |
| nuts (e.g. almonds, brazil nut, walnut, pecan, pistachio, macadamia nut, Queensland nut) and product thereof                            | Not included             | No                          |                     |
| celery and product thereof                                                                                                              | Not included             | No                          |                     |
| mustard and product thereof                                                                                                             | Not included             | No                          |                     |
| sesame and product thereof                                                                                                              | Not included             | No                          |                     |
| lupine and product thereof                                                                                                              | Not included             | No                          |                     |
| molluscs and product thereof                                                                                                            | Not included             | No                          |                     |
| sulphur dioxide and sulphites at concentrations > 10 mg/kg expressed as SO <sub>2</sub>                                                 | Not included             | No                          |                     |

## 9 GMO

In accordance to the council regulations of the European parliament dated 22<sup>th</sup> of September 2003 (EU) no. 1829/2003 referring to genetically modified food and feed and the regulation (EU) 1830/2003 concerning the traceability and labelling of genetically modified organisms and the traceability of food and feed products produced from GMOs and the amending directive 2001/18/EC we confirm that the delivered products are not from genetically modified organisms (GVO) and do not contain GMOs and are not produced from or contain ingredients produced from GMOs. The product is guaranteed free of corn or soy-based genetically modified organisms which in accordance to regulation (EC) No 1829/2003 and regulation (EC) No 1830/2003 have to be labelled. Exceptions are incidental or technically unavoidable contaminations with genetically modified material up to a threshold of 0.9 % of the ingredient.

## 10 Legal requirements

The quality of the delivered product is in conformity with the German and European food law considering the relevant special requirements for the specific product.

## 11 General agreements

**Traceability:** a system for traceability, including all ingredients, which shows origin, storage, removal of the goods and ingredients (according to EC-regulation No 178/2002) is established and documented. This documentation is available and can be submitted on request.

**Radiation:** The supplier warrants according the LMBestV and the guidelines 1992/2/EG and 1999/3/EG the exclusion of foods, plants, ingredients, additives, animal feed, which have been treated with ionizing radiation.

**Pesticide residues:** Residues of crop protection, pest control and other appropriations do not exceed the allowable limits in accordance to the EU regulations of 396/2005.

**Pollutant residues:** Residues of pollutant can't be exceeded according to EC 2023/915 codified maximum amounts, in the version valid at the time of delivery.

The product is not subject to the Novel Food Regulation 2015/2283, in the version valid at the time of delivery.

Goods from not GFSI certified suppliers can be provided. For further questions please ask the Keyaniyan Company GmbH.
