SILIKOMART DECLARATION OF THE RAW MATERIAL USED FOR MANUFACTURING SILIKOMART SILICONE MOULDS

We hereby certify that all the silicone moulds supplied to your company are manufactured in our company based in Mellaredo di Pianiga (Venice) - Italy, by using the same raw material (100% pure liquid platinum silicone type LSR) and same manufacturing process (injection process).

Please note that silicone rubber raw materials are able to resist temperatures from -60°C to 230°C under normal usage conditions.

We hereby declare that the above mentioned moulds comply to all relevant laws, with particular reference to:

- Regulation 1935/2004/EC on material and articles intended to come into contact with food;
- BfR Reccomandation XV (Silicones);
- Arrête du 9 novembre 1994 relatif aux matériaux et objets en caoutchouc au contact des denrées, produits et boissons alimentaires;
- to FDA 21 CFR 177.2600 on rubber articles intended for repeated use;
- ResAP (2004) 5 on silicones used for food contact applications.

Silikomart Srl also declares that the production cycle of the company pursues the GMP - Good Manufacturing Practices - mentioned in Regulation (EC) 2023/2006.

Moreover we hereby declare that all our products made with platinum LSR raw material does not contain "Substance of Very High Concern" according to the Regulation 1907/2006/EC to more than 0,1 % (191 Substances SVHC - list updated to 27/06/2018) and are free of any organotins and Bisphenol A (BPA).

Best regards

Alberto Pasetto
