

Declaration of Compliance

for articles intended to come into contact with food
(according the regulation **1935/2004/EC**)

Hereby we declare that our article

Container (668x452x412 mm), AZ1108, PP, 9276.000.000
Container (660x450x225 mm), AZ1103, HDPE, 9336.000.000
Lid (657x425 mm), D238, PS, 9324.000.000
Container (670x451x123mm), R19025, HDPE, 9566.000.761

In use at: **Bäko- Zentrale Süddeutschland eG**
Duisburger Straße 66
90451 Nürnberg
Deutschland

and the materials used to manufacture these article(s) comply with the regulation **1935/2004/EC** in valid version at the time of the distribution of this declaration and corresponds as well to the regulation over good manufacturing practice for materials and articles intended to come into contact with food (GMP) **2023/2006/EC**.

The overall migration and the specific migration are -within intended use- under the legal limit values in accordance with the regulation **10/2011/EC**. The used raw materials and additives comply with the consumer article regulation (and/or correspondences) into the European plastic regulation **10/2011/EC** as well as the transition periods and changes of this guideline valid at the time of the distribution of this declaration (up to **EU 202/2014**).

The above mentioned product may contain substances with specific migration limit (SML) and maximum permitted quantity (QM), which are specified in the regulation **10/2011/EC** with the respective limit values.
The limit values of the total and specific migration are not reached or exceeded.

Specifications to the intended use or restrictions:

1. Type or types of food, which are intended to come into contact with the product:
Food stuff.
2. Type or types of food, which are not intended to come into contact with the product:
Hot products (above 30°C).
3. Time and temperature of treatment and storage in direct contact with the food:
Max. 10 days with max. +30° Celsius

To estimate the relationship between the surface area and the quantity of food in contact, the migration is calculated using the conventional surface area/volume conversion factor of 6 dm²/kg.

No “**plastic functional barrier**” is used. No “**dual use substances**” are intentionally added by Schoeller Allibert.

The user himself has to assure the suitability of the product regarding the intended filling goods and the operating conditions, since these can deviate from the standardized conditions in the directives and regulations. The responsibility regarding the suitability of the product(s) for the intended use and the preservation of migration values under condition of use remains at the user!

This declaration is valid up to revocation and replaces all previous declarations for this article which are not valid anymore.
